Subject: Our volunteering work

Dear Omar,

I write to you this email to tell you about our volunteering work in our community. Volunteering work is an amazing idea. It helps the individuals and community. We can encourage young people to volunteer in their community and help their environment. Last week I went to the school trip to Alexandria. When we went to the beach, the beach was dirty. It has a lot of trash. I was a bit sad. I decide to help this beach. I organized a beach clean-up with my friends. We collect the trash. We put bin everywhere. "A paragraph about a garage sale"

Every year we have a garage sale at our school. Volunteers from our school all bring in old items like clothes, books, toys, or kitchen equipment. These items are old, but they are still in good shape and can be used again. These items are sold to anyone who would like to buy them. The money we collect is used to help children who are in hospitals. We also buy some new toys and take them to the children with our teachers.

A paragraph about :

"Helping younger children"

My class likes to help the younger children at our school. Some of the children in Grades 3 and 4 find it difficult to read, write, or do math. So, twice a week, we go to their classrooms. We sit with them, listen to them read stories, and help them do calculations. The children love our school newspaper because there are articles about people they know in school. They sometimes know the journalists, too!

Dear Basma,

How are you ? Have you read about the cheetahs' return ? The cheetahs are back! Cheetahs lived in India until the 1950s, but then slowly disappeared. However, eight of them were brought to Kuno National Park. The cheetahs now live in a safe area and

they are fed every day. Also they are tracked so that they don't get lost. Some people are worried as they will meet leopards and other big cats, but it's important that cheetahs are protected now.

Yours,
Hadeer

Dear Fares,

How are things ?

Drinking dirty water can cause diseases because dirty water has a lot of bacteria. To prevent yourself from getting sick, wash your hands often and drink clean water. Store fresh food in a refrigerator, or a cool dry place in your kitchen. The food will stay fresh and it won't start to decompose.

Your sincerely,
Zein
